Number of Modules: 12

Affiliate: Diamond Builders | Design Space | T&R Custom

Location: Kissimmee, Florida

Total Square Feet: 10360

Building Use: Classrooms

Days to Complete: 122

Architectural Excellence

Reborn Christian Academy came to VESTA Modular wanting to relocate their High School Students from their existing Brick and Mortar building to a series of Modular Classrooms the original plan was to utilize 12 24x36 single classroom portables each with a Restroom

Technical Innovation & Sustainability

After consulting with Pastor Edwin Ramirez, we advised that we could utilize 1 96x70 8 Classroom building with adequate restroom facilities for General Education Classrooms, 1 28x70 Classroom for a Vocational Training Classroom and Admin Office and 1 28x60 to be utilized as a Therapy Office these buildings were in our Lease Inventory.

Cost Effectiveness

VESTA Modular, showed that by doing this his Cost for Mechanical Connections, ADA Ramp requirements, and Fire and Security systems would be greatly reduced. Not to mention that reducing the number of exterior doors would add to the security of the Complex.
